

FRAUD – CC DETECTION

Your team has received a task related to credit-card transaction analysis. A file with 3 years of data was shared and 3 reports (table + graph) were requested.

Additionally, the company has requested a simple report that points out a list of potential transaction frauds. The team can define one or more business rules to categorize a transaction as a fraud. Attached you have a CSV file with data.

Attached you have a csv file with data.
